

Skilled Nursing Facility

What is a Skilled Nursing Facility?

A skilled nursing facility or nursing home provides 24-hour medical care in addition to custodial care. Residents may live at our skilled nursing facility temporarily or for long-term care. At Greenridge Senior Care our sixty-bed skilled nursing facility is licensed and regulated by the State Department of Public Health and individually certified by the State for Medicare and Medicaid.

Skilled nursing facilities are ideal for those who:

- Can no longer take care of their personal needs
- Need 24-hour supervision
- Need monitoring by a registered nurse

Our various levels of care in our skilled nursing facility include:

- Basic Care: this is help required to maintain a resident's activities of daily living. It includes personal care, supervision and safety.
- Skilled Care: requires the services of a registered nurse on a regular basis.
- Sub-Acute Care: this involves comprehensive in-patient care and is designed for someone who has had an acute illness, injury or progression or onset of disease.
